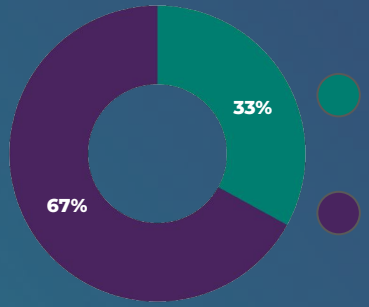
SCRUMMY

AI Powered Project Management: Accelerate Workflow

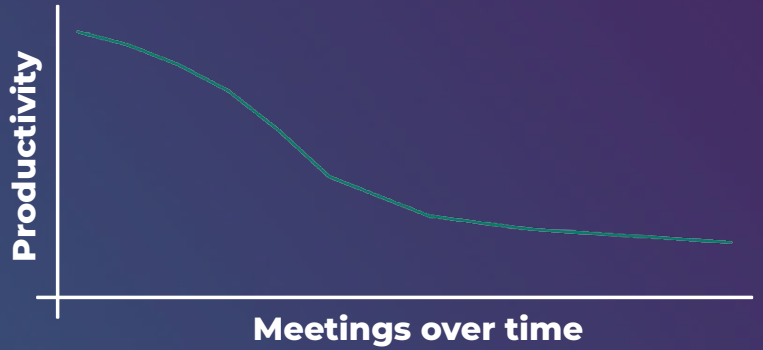
Problems with Project Management



(In most countries, out of 40 hours weekly)

Time spent in meetings/week (13 H)

Time spent on other tasks/week (27 H)



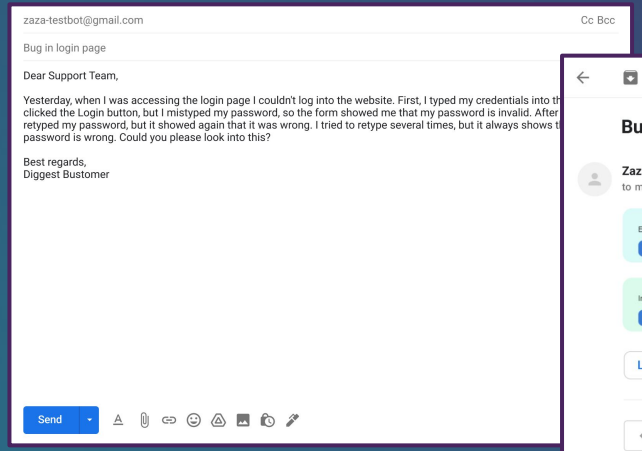
Additional concerns:

- ❑ Mental Autopilot
- ❑ Lack of stimuli
- ❑ Hard to formulate summaries

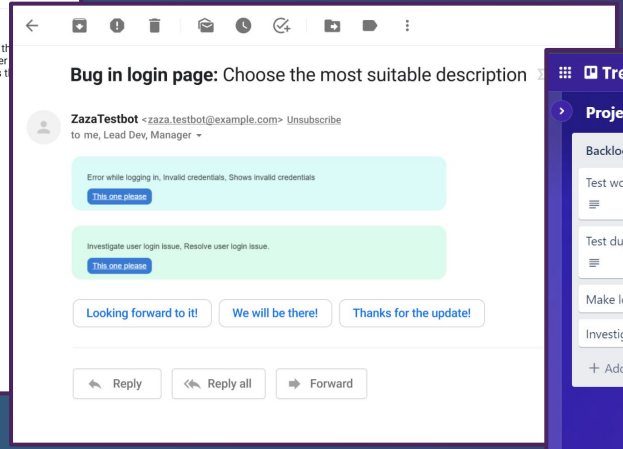
Sources: Meeting Hours | Productivity

Product Vision

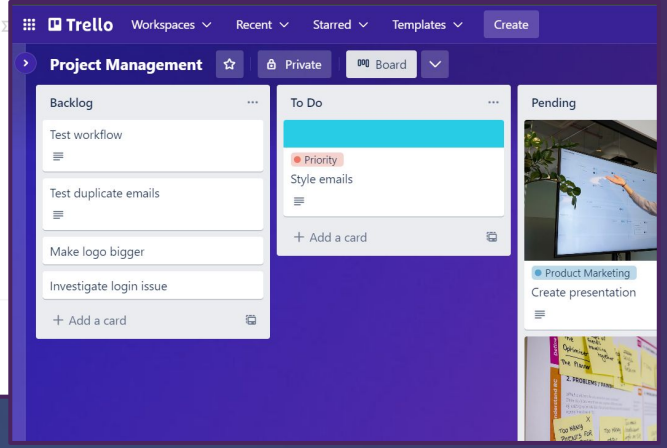
Product Demo



1. The client writes an email about an issue or feature request



2. Scrummy creates a summary and confirms the summary with the client.

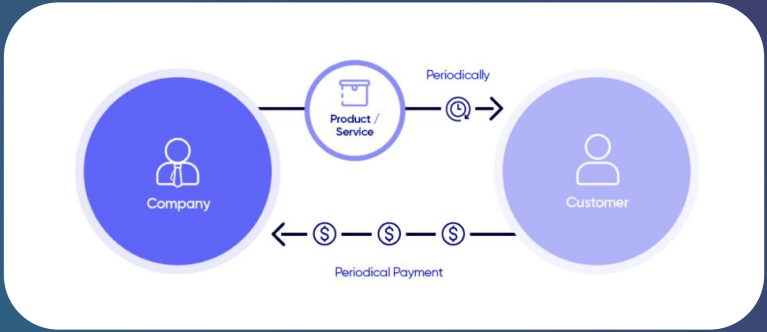


3. After confirmation, a new ticket is created in the project management application

Business Model

150.000* Potential SME in Europe x 100€ monthly fee = 1.5M € MRR

with potential addressable market of 1.5M SMEs



Subscription-Based Business Model

Source: Statista, 1.5M SME in Europe. We considered the best case scenario as 1%.

SWOT

Strengths

- Efficient automated ticket creation
- Improved ticket descriptions
- Better project management - identifying blockers, calculate time estimation and capacity
- Delivering high quality products quickly
- Helping developers working more efficiently

Weaknesses

- Competitors may offer similar or better features.
- New project management tools may arise with enhanced automation and accuracy features.
- Changes in the Agile development industry may decrease the demand for such tools.

Opportunities

- Not suitable for all organizations or projects
- May require a learning curve for some users
- Additional customization for specific needs

Threats

- Collaborate with other project management tools
- Develop mobile application for on-the-go accessibility
- Broaden the intended audience beyond Agile development.

User stories

As a Scrum master I want to save time by automating the ticket creation process, so that I can focus on other important tasks.

As a developer I want to have more accurate ticket descriptions. With this I can work more efficiently and deliver high-quality product.

As a project manager, I want to identify blockers and calculate time estimation and capacity.

Competitors

Eightfold

- Specializes in talent acquisition
- Help employees build their career profile
- Build diverse, equitable workforce

Movework

- Automate IT support
- Automate other business workflows
- Automate finance and facilities management

Frame.AI

- Analyzes customer feedback
- Creates insights based on tickets
- Creates insights based on surveys and social media
